

## Design and Technology : S3 Home Learning Task Term 2

### TV Remote control - user trial

Either find an image of your TV remote control and paste into the box below or sketch your remote control in the box below.

Do a 'USER TRIAL' of the remote control taking into account the following functions, annotate your image to answer the below:

1. Turn the volume up and down - how do you do this? what finger do you use?  
how is the remote control designed so you can do this?
2. Change the channel - how do you do this? what finger do you use?  
how is the remote control designed so you can do this?
3. Does anything happen when you press a button? What is it and why does it happen?
4. Take the back cover off and change the batteries. Is this easy to do? Anything complicated in the process?
5. Clean the remote control. Is it easy to clean? Are there any areas that are hard to access?

How did you get to them? Any special tools required?

6. Do you have any relevant questions that you want to answer around the remote control?

Add them below
