Linlithgow Academy

S3 Family Learning Activity – Computing Science

Term 2

In this task you are going to use your HTML and CSS programming skills to create a simple web page about a technology that has had an impact on your family life. For this task you will need to question members of your family to ask the technology that has most impacted their lives and agree on one to base your web page on:

- Home Page (index.html) – Describe the technology you have chosen and how it has impacted your lives.

Your web page should include:

- Headings
- Paragraphs
- Images
- At least one list
- Hyperlink to an external website
- CSS styles

You can access the blank project in your replit team. Use your Class Notebook for help if you need it.

Enjoy!
