

Summary of Feedback received from S1 Parents Evening 6.11.24

Overall feedback received

The feedback on the online parent-teacher meetings was largely positive, with many praising the convenience, efficiency, and structured timing of the virtual format, which allowed them to fit appointments around other commitments.

Most parents appreciated the teachers' in-depth knowledge of their children's progress, curriculum details, and next steps, with specific teachers receiving commendations for their support and enthusiasm.

A few parents encountered technical issues, such as sound problems, platform glitches, and occasional time sync issues, which disrupted communication in some sessions.

A frequent suggestion was to extend the time slots slightly, as the five-minute window felt too brief.

A few parents also expressed a preference for in-person meetings, feeling it would provide a more engaging and personal experience.

Overall, the system was considered very user-friendly and effective, despite a few technical and timing challenges.

Commented [GA1]: If we increase time per appointment, we reduce the amount of appointments available. Appointment times are increased to 6 minutes in senior phase classes.
